

User Acceptance Testing (UAT) Template

Date	12 July 2024
Team ID	SWTID1719923176
Project Name	Freelance-Finder
Maximum Marks	

Project Overview:

Project Name: Freelance Finder

Project Description: Freelance Finder is a web application designed to connect freelancers with potential clients. It allows freelancers to create profiles, showcase their skills, and apply for job postings. Clients can post jobs, search for freelancers, and communicate with them directly through the platform.

Project Version: 1.0.0

Testing Period: 18/07/24 to 19/07/24

Testing Scope:

- User Authentication
- Freelancer Profile Management
- Job Posting and Application System
- Search and Filter Functionality
- Messaging System
- Review and Rating System

User Stories or Requirements to be Tested:

- As a freelancer, I want to create and manage my profile.
- As a client, I want to post jobs and search for freelancers.
- As a user, I want to authenticate using my credentials.
- As a user, I want to send and receive messages.
- As a client, I want to review and rate freelancers.

Testing Environment:

URL/Location: <https://localhost5173/user-auth>

Credentials (if required): username- abcd@gmail.com

Password- 1234

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Verify user registration process	1. Navigate to the registration page. 2. Enter valid email, password, and confirm password. 3. Click on the 'Register' button.	User is successfully registered and directed to the dashboard.	https://youtu.be/1PUTAUeNfsk	Pass
...

Bug

Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Verify user login process	1. Navigate to the login page. 2. Enter valid email and password. 3. Click on the 'Login' button.	User is successfully logged in and directed to the dashboard.	Closed

Signature: Aryaman

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.

- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
